

What's in this sample file.

A reference sample for AI Smart Redact, provided alongside the product documentation. Run it through the engine to verify what's detected out of the box and to see how to add a custom label of your own.

ALREADY DETECTED — BUILT-IN LABELS

WHAT GETS DETECTED

EXAMPLE IN THIS SAMPLE

PERSON	Stefan Hofmann-Vogel · Anna-Lucia Moretti
EMAIL · PHONE NUMBER	s.hofmann@pdf tools .com · +41 79 412 88 03
PHYSICAL ADDRESS	Mattenhofstrasse 22, 3007 Bern
DATE · TIME	28.03.2026 · 03:14:22
IBAN · BIC / SWIFT	CH97 8914 4433 3625 2861 4 · CRESCHZZ80A

ADDING DOMAIN-SPECIFIC LABELS OF YOUR OWN

Custom labels let you detect information that isn't covered out of the box — like the **Swiss social security number (AHV / AVS)** in this sample. Define the label once, then bind it to a regex, an AI entity, or both.

1

Add a custom label

↳ Entity Labels → Custom Labels

Enter a name and click **+ Add**. The label becomes available as a chip wherever labels are referenced.

LABEL	AHV_NUMBER
-------	------------

Use uppercase with underscores (e.g. AHV_NUMBER) to match built-in labels like PERSON or IBAN_CODE.

2

Add a custom recognizer

↳ Patterns → Custom Patterns

Bind a regular expression to your label. Context words raise confidence when the pattern alone is ambiguous.

NAME	AHV_NUMBER
LABEL	AHV_NUMBER
CONTEXT	AHV, AVS, Sozialvers.
REGEX	756\.\d{4}\.\d{4}\.\d{2}
SCORE	0.8

Score is the minimum confidence required for a match to be surfaced to reviewers.

3

Add the entity to the AI model's list OPTIONAL

↳ Advanced → Semantic Recognizer

Add a plain-language entity name to the model's detection list. The model will then surface matches directly — no regex required. Useful for fuzzy categories that resist patterns.

PROMPT	job title
LABEL	JOB_TITLE

Phrase entries in natural language (job title, not JOB_TITLE). Verify a few documents — zero-shot accuracy varies by entity.

Policy no.: UVG-2026-884213

INCIDENT DESCRIPTION

On 28.03.2026 the insured, working as a Senior Logistics Coordinator, slipped on a loading ramp at the Zurich-Oerlikon warehouse. The Swiss social security number (AHV) 756.1234.5678.97 was provided to the attending physician for billing. The direct supervisor, Anna-Lucia Moretti (Head of Operations), confirmed the incident.

Ms Petra Brunner (Warehouse Supervisor) acted as a witness; her AHV number 756.9876.5432.17 was recorded for the case file. Initial medical treatment was provided by Dr. Marcel Iten, Physician, whose professional credentials are attached to the dossier.

PERSONS INVOLVED — OVERVIEW

NAME	AHV NO.	ROLE
Stefan Hofmann-Vogel	756.1234.5678.97	Senior Logistics Coordinator
Anna-Lucia Moretti	756.4521.8833.04	Head of Operations
Petra Brunner	756.9876.5432.17	Warehouse Supervisor
Marcel Iten	756.3344.7788.28	Physician
Roland Keller	756.5566.1122.82	Health & Safety Officer

DECLARATION

The insured confirms that the information provided above is accurate. The AHV number and occupation are to be used solely for the processing of this insurance claim.
